The maxgraft® bonering technique

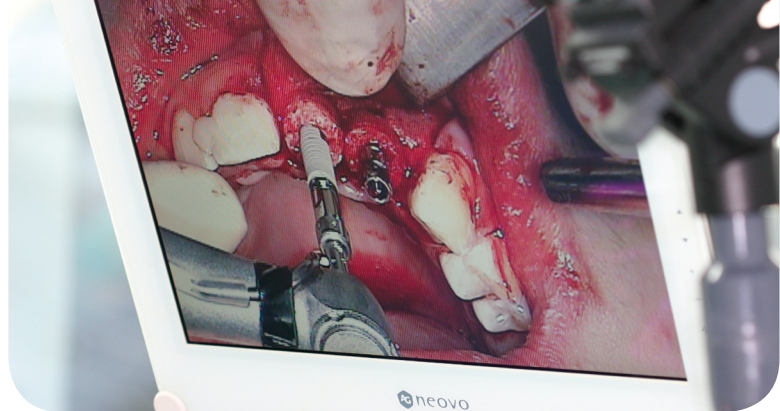

LIVE

Bone augmentation and implantation in a one-stage procedure

The bone ring technique allows vertical and horizontal augmentation and is applicable for almost all indications, including sinus lift with limited maxillary bone height. Compared to classic, two-stage block augmentation, this technique reduces the entire treatment period by several months and saves the re-entry.

A ring-shaped bone transplant is placed precisely within a trephine drill - prepared "ring bed" and fixed by direct implant insertion. The high success rate of the bone ring technique can be regarded to the exact fit of bone transplant and recipient site.

maxgraft® bonering, a pre-fabricated ring of processed allogenic donor bone, supersedes the harvesting of autologous bone. Thus, pain, donor site morbidity, operation time and total costs are reduced significantly.

maxgraft® bonering, due to its physiological structure and composition, allows optimal graft vascularization and new bone formation, thereby simplifying the surgical treatment of 3-dimensional bone defects.

botiss biomaterials, the leading German specialist for dental bone and tissue regeneration, invites you for the first episode of maxgraft® bonering live.

Live from Frankfurt/Main, Germany
Dr. Bernhard Giesenhagen &
Dr. Orcan Yüksel

Start: 11th May 2013

Local time Germany

11.00h - 12.30h maxgraft® bonering – live surgery

13.00h - 16.00h Lecture: the maxgraft® bonering technique

- Background
- Indications
- The procedure – step by step
- Soft tissue management
- Clinical cases
- Trouble-shooting
- Limitations

YÜKSEL-GIESENHAGEN
DENTALE IMPLANTOLOGIE

maxgraft® bonering surgical kit

[Dr. Bernhard Giesenhagen](#)

Studied at the Christian-Albrechts University Kiel, Germany / Scientific co-worker in the Department of Prosthetics at the Christian-Albrechts University / Since 1980 implantology practice in Melsungen / Training activities as founder of the Pro Implant institute in Melsungen

[Dr. Orcan Yüksel](#)

Studied at the Johann-Wolfgang-Goethe University Frankfurt/Main, Germany and at the University of Istanbul, Turkey / Since 1993 implantologist in private practice in his own clinic with integrated training activities in Frankfurt/Main / Editorial member of the dental journal „Quintessenz“

Use the unique opportunity to participate in one of the popular workshops of Dr. Bernhard Giesenhagen & Dr. Orcan Yüksel.

Learn everything about the bone ring technique, watch maxgraft® bonering in surgery and ask all your questions via live-chat.

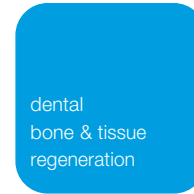

For registration please contact:

E-mail: info@botiss.com.tr

Tel: +90 (212) 234 8315-16

After registration you will receive an email confirmation with the login data.

The participation in maxgraft® bonering live is free of charge.
